EDUCATION

Bachelor of Engineering in Computer Science

Sep 2023 – Jun 2026

Modern Education Society's Wadia College of Engineering, Pune

CGPA: 9.42

Secured a top academic position in the department across all semesters.

Diploma in Computer Engineering

2020 – 2023

Govt. Polytechnic Awasari (Kh)

Percentage: 88.51%

CBSE Class X

2020

Kendriya Vidyalaya 9BRD Pune

Percentage: 91.60%

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, Firebase, Power BI

Core Concepts: Data Structures & Algorithms, Machine Learning, REST APIs, Data Analysis, Agile Methodology

EXPERIENCE

Project Engineer Intern – Codeft Technologies Pvt. Ltd.

June 2023 – August 2023

- Designed and developed 3 client web applications across e-commerce and local-business verticals, translating business requirements into responsive, production-ready front-end interfaces using JavaScript, HTML, and CSS.
- Collaborated with a cross-functional team of 5+ under Agile-style 2-week sprints and daily stand-ups, delivering all 3 projects on schedule within an 8-week internship.
- Built fully responsive layouts tested across desktop and mobile breakpoints, iterating through multiple client feedback cycles to align UI with evolving business requirements.

PROJECTS

MindMate – Personalised AI-Based Platform for Mental Health Support

Tools & Technologies: Python, PyTorch, Hugging Face Transformers, DeBERTa-v3-small, Vision Transformer (ViT), React.js, Node.js, Firebase, Twilio

- Fine-tuned a **DeBERTa-v3-small Transformer** on the **GoEmotions dataset (28 emotion classes)** for multi-label text emotion classification, achieving **96.9% Hamming accuracy** and **0.95 ROC-AUC** on the held-out test set.
- Designed an **end-to-end multimodal emotion analysis pipeline** combining text, selfie, video, and quiz signals through a weighted **PMI-based fusion approach**; integrated a fine-tuned **Vision Transformer (ViT)** achieving **87.6% accuracy**.
- Implemented production-oriented ML workflows for **data preprocessing, model inference, multimodal aggregation, and structured emotion outputs**, with privacy-conscious handling through anonymized storage and automatic deletion of raw media.
- Developed a **Nodemailer-based Emergency Safety Gateway** for real-time crisis alerts, integrating ML outputs with application-level safety workflows.

EduTrack – School Management System

Tools & Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, Socket.io, AI Chatbot

- Developed a full-stack school management system supporting **3 user roles** across **4 modules** – Students, Staff, Hostel, and Attendance – managing **500+ student records**.
- Designed **RESTful APIs and MongoDB data models** for student management, attendance tracking, hostel operations, and role-based workflows.
- Integrated an **AI chatbot and Socket.io-based real-time communication system**, reducing manual administrative query handling by **40%** through automated responses and instant communication.

Study Material Hub – Learning Resource Management Platform

Tools & Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, Multer, Cloudinary

- Built a **RESTful learning resource platform** for uploading, viewing, rating, and categorizing PDF study materials, supporting **200+ resources across 10+ categories**.
- Implemented a secure **file-upload and cloud-storage pipeline** using Multer and Cloudinary, with validation and automated media handling for reliable resource management.

ACHIEVEMENTS & CERTIFICATIONS

- Secured leading position in the Web Development Competition organized by Vishwakarma University in collaboration with Binghamton University, USA (October 2024).
- “Introduction to Cloud Computing with AWS, Azure and GCP” – Udemy, March 2025
